Validation fairness-utility frontier at 40% target capacity
Validation fold 1
Validation fold 2
Validation fold 3
Validation fold 4
Validation fold 5
Minimum estimated race-group earnings benefit
Validation utility loss relative to the unconstrained maximum
Within 200-unit tolerance
Non-dominated candidates
Fails point floor
Passes point floor only
Passes lower-bound floor
Higher group benefit is preferable.
Lower utility loss is preferable.
Each point is a candidate evaluated
on its own validation fold.
